

QUSAY ALBWAYZEH

Technical Team Lead

Experience

Technical Team Lead

Estarta Solutions

JAN 2025 - Present

- Led the design and implementation of scalable enterprise solutions using ASP.NET Core, MVC, Razor Pages, C#, REST/SOAP APIs, and Entity Framework, leveraging AI-assisted development to improve delivery and code quality.
- Acted as the primary technical contact for multiple clients, managing requirements, delivery timelines, and solution quality.
- Integrated AI-driven development tools to improve solution architecture, documentation, and implementation.
- Led cross-functional teams using Azure DevOps and TFS, promoting AI-assisted development to improve productivity and software quality.
- Conducted technical interviews, mentored engineers, and managed onboarding and technical training.
- Prepared technical proposals including solution architecture, technology stack, technical assumptions, resource planning, and project timelines using AI-assisted analysis.
- Ensured application performance and quality through coding standards, testing, and engineering best practices.

Senior Software Engineer

Estarta Solutions

SEP 2021 - DEC 2024

- Developed enterprise applications using ASP.NET Core, MVC, Razor Pages, C#, REST/SOAP APIs, and Entity Framework.
- Integrated payment systems and enterprise messaging platforms including IBM MQ, Message Broker, and Custom Middleware.
- Developed BizTalk Server solutions including orchestrations, maps, pipelines, and schemas.
- Designed and optimized SQL Server databases using complex queries, stored procedures, and SQL Jobs.
- Built and deployed scalable APIs and services using ASP.NET Core.
- Developed responsive UIs using Bootstrap, Tailwind, Telerik Kendo, jQuery, and AJAX.
- Configured and deployed applications, services, and databases on Windows Server and IIS using CI/CD.
- Diagnosed and resolved production issues through debugging and root cause analysis.
- Ensured application performance, reliability, and maintainability through software engineering best practices.

Experienced Software Engineer and Technical Team Lead specializing in designing and delivering scalable enterprise solutions using .NET, Azure, SQL Server, APIs, and integration platforms. Skilled in solution architecture, SDLC delivery, team leadership, and client collaboration, with a focus on leveraging AI-assisted development and modern engineering practices to build reliable, business-driven solutions.

Technology Stack

- ASP.NET Core
- ASP.NET Web Forms
- MVC, Razor
- C#, VB.NET
- RESTful, SOAP
- Entity Framework
- MSSQL, SSRS, Oracle
- AJAX, jQuery
- Microsoft BizTalk Server
- Desktop Applications
- IIS, Deployment
- Windows Server
- Azure DevOps, TFS, Git
- Azure Functions
- Telerik Kendo, DevExpress
- HTML, CSS, JavaScript
- Bootstrap, Tailwind
- CMS, WordPress
- AI-Powered Assistants
- AI-Assisted SW Development

Education

The Hashemite University

Computer Science

2011 - 2015

Languages

- Arabic (Native)
- English (Professional)

Senior Web Applications Developer

Ministry of Higher Education and Scientific Research - Jordan

JAN 2018 - SEP 2021

- Developed large-scale systems serving internal ministry departments, universities, and students across the world.
- Owned the full software development lifecycle (SDLC), including scoping, design, development, testing, deployment, and maintenance of ministry applications.
- Developed enterprise applications using ASP.NET Web Forms, MVC, C#, VB.NET, and custom ORM solutions.
- Designed and maintained SQL Server and Oracle databases, improving data retrieval and system performance.
- Built interactive UI components using JavaScript, jQuery, DevExpress, and Bootstrap.
- Created and maintained desktop applications supporting internal business workflows.
- Worked with SSRS for operational and analytical reporting.
- Managed deployments on IIS and Windows Server environments with TFS version control.
- Performed system debugging and issue resolution to ensure continuous availability.

Web Developer

ATN Network

AUG 2017 - JAN 2018

- Developed IPTV and streaming-related applications using C#, JavaScript, and UDP-based communication.
- Built and consumed APIs supporting video delivery and content management.
- Worked with MSSQL for backend data operations.
- Deployed applications, services and supported CMS-based solutions for daily operations.

Web Applications Developer

Knowledge Horizon

JUL 2015 - JUL 2017

- Worked on large-scale online training systems supporting high volumes of active users.
- Built web applications using ASP.NET Web Forms, C#, VB.NET, and custom ORM approaches.
- Developed desktop applications supporting e-learning platforms.
- Implemented front-end interfaces using HTML, CSS, JavaScript, and jQuery.
- Designed and maintained MSSQL databases and optimized data access layers.
- Delivered user-friendly solutions to support e-learning platforms.
